

MOTORCYCLE BATTERY HINTS & TIPS

Thank you for purchasing your motorcycle battery from BBL Batteries. We hope you enjoy many months of trouble-free motorcycling. Please note the following;

WHEN YOU FIRST RECEIVE YOUR BATTERY: We recommend that you give the battery an initial top up charge.

MOTORCYCLE BATTERIES LIKE BEING USED: They do not like being unused or left uncharged. If left for any length of time without being charged, even if they are not connected, all lead-acid batteries will go through a natural process of self-discharging. If the battery has reached the stage of being deeply discharged it is sometimes impossible to recover it. If the battery is connected to the bike and the bike has an alarm or immobiliser fitted, the time it takes a battery to reach a deeply discharged state can be short, often a matter of days.

REGULAR CHARGING: Is the only way to ensure a long life from your battery and work against the natural process of self-discharge. Most intelligent motorcycle battery chargers come with leads which can be permanently fixed to your battery with the battery connector neatly hidden away in the bike. Charging is then an easy matter of plugging the connector in to the charger. If your bike's not being used for long periods, charge battery once a month. Do not leave it on charge permanently as this can eventually dry out the battery.

ELECTROLYTE: Conventional non sealed batteries need to have their electrolyte checked and topped up with distilled water at regular intervals.

GUARANTEE: Your new Battery is guaranteed against manufacturing faults for a period of 1 year from the date of purchase. In the unfortunate event of a failure please return it with a copy of your original purchase receipt. We can only test fully charged batteries.

TEST RESULT: We will test the battery and should the battery prove to have a manufacturing fault it will be replaced. However we will not replace the battery if it is faulty through misuse. Any battery not claimed after 14 days of the test results being communicated will be sent for recycling.
